(54) Title: CIRCUIT AND METHOD FOR DRIVING A LIGHT-EMITTING DISPLAY

(57) Abstract: The invention proposes a circuit for an element (3) of a light-emitting display. The element comprises a current control means (4), first and second switching means (12, 10) and a light-emitting means (8). In one embodiment, a signal holding means (6) is provided. In addition, a light-emitting display having a plurality of elements (3) is proposed. Furthermore, a method for driving the elements (3) and the light-emitting display is proposed, and also a control signal for use with the method.
